FREEPORT RESOURCES INC.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE PERIOD ENDED APRIL 30, 2025 AND 2024

Unaudited – Prepared by Management

(Expressed in Canadian Dollars)

1. NATURE AND CONTINUANCE OF OPERATIONS

Freeport Resources Inc. (the “Company”) is incorporated in British Columbia and is listed on the TSX Venture Exchange (“TSX-V”) under the symbol “FRI” and listed on the OTCQB under the ticker symbol “FEERF”. The Company is a Canadian junior mineral exploration company that controls an application for the renewal of an exploration license located in Papua New Guinea (PNG).

The Company’s head office, principal address and registered and records office are located at Suite 250, 750 West Pender Street, Vancouver, BC V6C 2T7.

At April 30, 2025, the Company had not yet determined whether its properties contain reserves that are economically recoverable. The recoverability of amounts shown for exploration and evaluation assets and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production from the exploration and evaluation assets or proceeds from the disposition of the exploration and evaluation asset.

These condensed consolidated interim financial statements have been prepared with the going concern assumption, which assumes that the Company will continue in operation for the foreseeable future and, accordingly will be able to realize its assets and discharge its liabilities in the normal course of operations. At April 30, 2025, the Company had an accumulated deficit of \$30,882,976 and expected to incur further losses, and required additional equity financing to continue developing its business and to meet its obligations. While the Company has been successful at raising additional equity financing in the past, there is no guarantee that it will continue to do so in the future, which results in a material uncertainty that casts significant doubt on the Company’s ability to continue as a going concern.

The Company’s ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing and generating revenues sufficient to cover its operating costs. These condensed consolidated interim financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying condensed consolidated interim financial statements. These adjustments could be material.

2. MATERIAL ACCOUNTING POLICY INFORMATION AND BASIS OF PREPARATION

The condensed consolidated interim financial statements were authorized for issue on June 24, 2025 by the directors of the Company.

The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the audited annual consolidated financial statements as at January 31, 2025. These unaudited condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended January 31, 2025.

Statement of compliance

The condensed consolidated interim financial statements of the Company, including comparatives, have been prepared in accordance with IFRS Accounting Standards (“IFRSs”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

Basis of preparation

The condensed consolidated interim financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. The condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise noted, the reporting currency of the Company.

2. MATERIAL ACCOUNTING POLICY INFORMATION AND BASIS OF PREPARATION (continued)***Basis of consolidation***

These condensed consolidated interim financial statements include the financial statements of the Company and the entities controlled by the Company. The financial statements of subsidiaries are included in the condensed consolidated interim financial statements from the date that control commences until the date that control ceases. All intercompany transactions and balances have been eliminated.

Subsidiaries

Subsidiaries are entities controlled by the Company. Control exists when the Company possesses power over an investee, has exposure to variable returns from the investee and has the ability to use its power over the investee to affect its returns. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company.

The principal subsidiaries of the Company are as follows:

Name of subsidiary	Principal activity	Place of Incorporation	Ownership Interest April 30, 2025	Ownership Interest January 31, 2025
Quidum Resources Inc. (“Quidum”)	Mineral property exploration	British Columbia	100%	100%
Highlands Pacific Resources Ltd. (“HPR”)	Mineral property exploration	Papua New Guinea	100%	100%
Carpo Resources Inc. (“Carpo”)	Mineral property exploration	British Columbia	100%	100%
Era Resources Inc. (“Era”)	Mineral property exploration	Cayman Islands	100%	100%
Marengo Mining (Australia) Pty Limited (“Marengo”)	Mineral property exploration	Australia	100%	100%
Yandera Mining Company Limited (“Yandera”)	Mineral property exploration	Papua New Guinea	100%	100%
Yandera Mining Company (Holdings) Pty Limited (“Yandera Holdings”)	Mineral property exploration	Australia	100%	100%

Significant estimates and assumptions

The preparation of financial statements in accordance with IFRS requires the Company to make estimates and assumptions concerning the future. The Company’s management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting years include the recoverability of the carrying value of exploration and evaluation assets and the recoverability and measurement of deferred tax assets.

3. MATERIAL ACCOUNTING POLICY INFORMATION AND BASIS OF PREPARATION (continued)***Significant judgments***

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in applying the Company's condensed consolidated interim financial statements include:

- The assessment of the Company's ability to continue as a going concern and whether there are events or conditions that may give rise to significant uncertainty;
- the classification / allocation of expenditures as exploration and evaluation expenditures or operating expenses;
- The functional currency is the currency of the primary economic environment in which the entity operates and is determined for each entity within the Company. The functional currency for the entities within the Company are: the Canadian dollar (the Company, Quidum, HPR, Carpo), the United States dollar ("US") (Era), the Australian dollar ("AUD") (Marengo, Yandera Holdings) and the Papua New Guinean kina ("PGK") (Yandera); and
- Fair value of stock options, warrants and compensation options.

3. EXPLORATION AND EVALUATION ASSETS

Ownership of mineral interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral interests. The Company has investigated ownership of its mineral interests and, to the best of its knowledge, such ownership interests are in good standing.

Yandera Copper Project

During the year ended January 31, 2022, the Company acquired all of the outstanding share capital of Carpo Resources Inc. ("Carpo"). Carpo was a privately held company that controlled Yandera, a corporation established under the laws of Papua New Guinea and which itself controls an application for the renewal of an exploration license located in Papua New Guinea, commonly known as the Yandera Copper Project. The seller retained a 1.5% net smelter return "NSR" on the first 20 years of production and the PNG government retains a 2% NSR on the property.

As at August 11, 2021, an application for the extension of the exploration license which had expired in November 2019 had been filed with the Minister of Mining for Papua New Guinea ("MPNG"). While the Company has certain rights to the Yandera Copper Project under the expired license, renewal of the license is subject to approval by the MPNG. The Company recorded \$109,901 during the period ended April 30, 2025 (2024 - \$100,230) to exploration and evaluation expenditures on the statement of comprehensive loss. During the year ended January 31, 2024, the Company received notification from the Papua New Guinea Mineral Resources Authority (the MRA) of the renewal of exploration license EL 1335, which covers the concession comprising the Yandera Copper Project. The renewal was granted with effect from November 20, 2019, for a term of two years ended November 19, 2021. In December 2023, the renewal was granted with effect from November 20, 2021 for a term of two years ended November 19, 2023, and a further renewal was granted for a term of two years from November 20, 2023 to November 19, 2025.

4. RELATED PARTY TRANSACTIONS

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors.

5. SHARE CAPITAL (continued)*Stock options and warrants*Stock options

The Company has a stock option plan allowing for the granting of options to the Company's directors, officers, employees, consultants and other service providers. Under this plan, the exercise price shall be determined by the Board of Directors or its designated committee (collectively the "Committee") at the time the option is granted, provided the exercise price shall not be less than the market price less applicable discounts permitted by the TSX-V. The option period shall be determined by the Committee at the time of the grant and may be up to ten years from the date of the grant.

During the year ended January 31, 2025, the Company granted 15,000,000 incentive stock options to certain directors, officers and consultants of the Company. The options vested immediately and are exercisable at a price of \$0.10 until June 28, 2029.

The following table summarizes the continuity of stock options:

6. CAPITAL MANAGEMENT

The Company manages its capital structure which consists of working and share capital, and makes adjustments to it depending on the funds available to the Company for acquisition, exploration and development of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

Unaudited – Prepared by Management

(Expressed in Canadian Dollars)

6. CAPITAL MANAGEMENT (continued)

The exploration and evaluation assets in which the Company currently has interests are in the exploration stage. As such, the Company is dependent on external financing to fund its activities. In order to carry out its planned exploration and pay for on-going general and administrative expenses, the Company will use existing working capital and expects to raise additional amounts through related parties or private placements as needed. The Company will continue to assess new exploration and evaluation assets and seeks to acquire additional interests if sufficient geologic or economic potential is established and adequate financial resources are available. Management reviews its capital management approach on an on-going basis and believes that this approach, given the small size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements and there were no significant changes in its approach to capital management during the period ended April 30, 2025.

7. FINANCIAL INSTRUMENTS**Classification of financial instruments**

Financial assets included in the statement of financial position are as follows:

	April 30, 2025 \$	January 31, 2025 \$
Amortized cost:		
Cash	1,928,082	2,405,359
Interest income receivable	48,703	44,976

Financial liabilities included in the statement of financial position are as follows:

	April 30, 2025 \$	January 31, 2025 \$
Amortized cost:		
Trade payables and accrued liabilities	125,443	123,367

Fair Value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market date.

As at April 30, 2025, the Company's financial instruments consist of cash, interest receivable, trade payables and amounts due to related parties. Cash and interest receivable are classified as amortized cost. Trade payables and due to related parties are also classified as amortized cost. The fair values of these financial instruments approximate their carrying values because of their short-term nature and/or the existence of market related interest rates on the instruments.

7. FINANCIAL INSTRUMENTS (continued)

The Company's financial instruments are exposed to a number of risks that are summarized below:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. The majority of cash is deposited in bank accounts held with one major bank in Canada so there is a concentration of credit risk. This risk is managed by using a major bank that is a high credit quality financial institution as determined by rating agencies. The Company's receivables consist mainly of tax credits receivable. The Company does not believe it is subject to significant credit risk.

Foreign currency risk

The Company is not exposed to significant foreign currency risk on fluctuations related to cash and accounts payable and accrued liabilities that are denominated in United States dollars ("US"), the Australian dollar ("AUD") and the Papua New Guinean kina ("PGK"). The Company does not use derivatives or other techniques to manage foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flow of a financial instrument will fluctuate because of changes in market interest rate. The Company's exposure to interest rate risk relates to its ability to earn interest income on cash balances at variable rates. The fair value of the Company's cash account is relatively small and unaffected by changes in short term interest rates.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting processing place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company attempts to ensure there is sufficient access to funds to meet on-going business requirements, taking into account its current cash position and potential funding sources.

8. SEGMENTED INFORMATION

The Company has one operating segment, the exploration of mineral properties, and one geographical segment, with all current exploration activities being conducted in Papua New Guinea.
